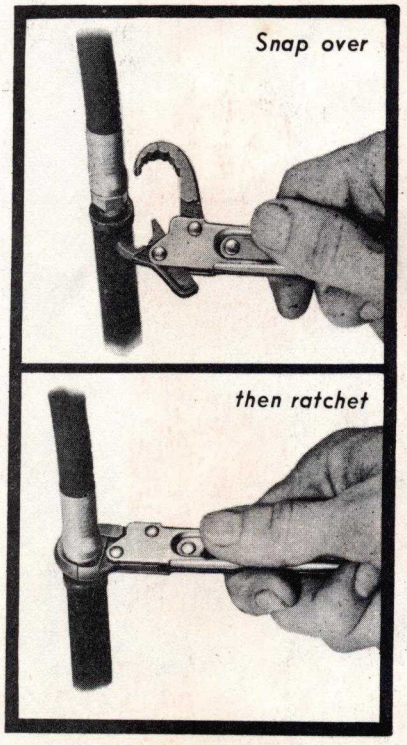
MV RATCH-IT

PATENTED



To remove, press wrench towards nut until it snaps open, then remove.

IT'S A NATURAL

The Most Revolutionary Ratchet Wrench Ever Designed, With Features That Make All Other Ratchet Wrenches Of Its Type Obsolete

1. Snaps over the side of a nut then ratchets. Ideal for tubing fittings, high pressure hose fittings, hydraulic hose fittings, etc., etc.

2. Positive locking action, the harder you pull the tighter it locks, but won't crush even the lightest brass or aluminum fittings.

3. Designed and built to withstand more than twice the torque required for any certain size of wrench of this type.

4. Simple and fast to operate, just snap over the side of a nut, then ratchet. To remove from nut, simply press the wrench towards the nut until it snaps open, then remove. Requires only one hand.

NUT HEX.	MODEL NO.	WIDTH OF WRENCH	THICKNESS OF WRENCH	OVERALL LENGTH	LIST PRICE EA.
* 3/8"	1000	3/4"	1/4"	5 3/16"	$3.50
7/16"	1001	27/32"	9/32"	5 7/32"	3.50
